

Biology of polypores

Workshop will be held 21th September 2019

The organizers: Dmitry Schigel & team TBA

Place: BPN museum

Free, but registration required

quota 25 participants.

Workshop booklet and four coffee breaks included, other costs self-organized.

No specific prerequisites for attendance

A compact workshop will be comprised of lectures on polypore biology, introduction to polypore interactions with other organisms, including relationships of polypores with tree and with insects, slide shows on the key polypore species of Białowieża, a light macroscopic identification session (keys in English or Polish provided), and a walking tour in the Park Pałacowy. Attendees with familiarize themselves or refresh their knowledge of the key aspects of the polypore biology and the main species groups of this charismatic group of wood-inhabiting Basidiomycetes of Central Europe.
